LinkedIn: linkedin.com/in/aimanasyraaf

Computer Science undergraduate specializing in Netcentric Computing with practical experience in network installation, configuration and technical troubleshooting. Skilled in software and mobile application development using Flutter and Firebase as well as IoT system development using ESP8266 and GPS technologies. Passionate about networking, software engineering and IT infrastructure with a strong desire to contribute to innovative technology solutions.

EDUCATION

BACHELOR OF COMPUTER SCIENCE (HONS.) NETCENTRIC COMPUTING

Universiti Teknologi MARA (UiTM) | Kampus Jasin, Melaka

OCTOBER 2024 – PRESENT

- Current GPA: 3.53
- Expected Graduation: February 2027
- Relevant coursework: Mobile Application Development, Software Engineering, Database Systems, Computer Networks, Network Security

DIPLOMA IN COMPUTER SCIENCE

Universiti Teknologi MARA (UiTM) | Kampus Kuala Terengganu, Terengganu

MARCH 2021 – AUGUST 2024

- Graduated: September 2024
- Relevant coursework: Web Application Development, Database Systems, Object-Oriented Programming, Computer Networks

WORK EXPERIENCE

NETWORK INSTALLATION ASSISTANT

Infradata Tech | Kuala Berang, Terengganu

MARCH 2024 – OCTOBER 2024

- Assisted in the installation and configuration of routers, switches and wireless access points for client networks.
 - Performed network troubleshooting, connectivity testing and maintenance to ensure stable network performance.
 - Supported network deployment activities including cabling, equipment setup and technical support.
 - Collaborated with team members to resolve technical issues and improve service delivery.
-

PROJECTS

AI REPAIR ASSISTANT MOBILE APPLICATION

- Developed a Flutter and Firebase-based mobile application to assist users in diagnosing and resolving device-related issues.
- Implemented user authentication, cloud database integration, and repair recommendation functionality

SMART NAVIGATION CANE FOR VISUALLY IMPAIRED INDIVIDUALS

- Developed an IoT-based smart cane using ESP8266, GPS, ultrasonic sensors, vibration motor, and buzzer. Implemented obstacle detection, emergency alert features, and real-time location tracking for caregiver monitoring.

SKILLS

- | | |
|------------|-----------------------------|
| • Dart | • Router Configuration |
| • Java | • Switch Configuration |
| • C++ | • Wireless AP Setup |
| • SQL | • Network Troubleshooting |
| • Flutter | • Git & GitHub |
| • Firebase | • ESP8266 & IoT Development |
-
